

## Ideation Phase

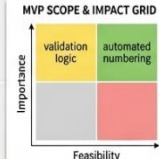

### Define the Problem Statements

|                      |                      |
|----------------------|----------------------|
| <b>Date</b>          | June 30 2026         |
| <b>Roll Number</b>   | 23A51A0535           |
| <b>Project Name</b>  | Library book Request |
| <b>Maximum Marks</b> | 2 Marks              |

#### Customer Problem Statement Template:

Create a problem statement to understand your student and librarian users' points of view. The Customer Problem Statement template helps you focus on what matters to create seamless, automated campus experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal platform configuration for the validation and tracking challenges your users face. Throughout the process, you'll also be able to empathize with your campus community, which helps you better understand how they perceive and interact with your automated digital workflow.

|                            |                                                                             |                                                                                               |                                                                                                             |                                                                                                                                                                                                                                                                                                                                      |
|----------------------------|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>I am</b>                | Describe student customer / librarian user with key characteristics.        | A current university student with a busy schedule and multiple courses.                       | Librarian staff managing high request volumes for course reserves.                                          | <b>MVP SCOPE &amp; IMPACT GRID</b><br><br><b>MVP Definition Phase</b><br>1 Launch Features <ul style="list-style-type: none"> <li>• custom table</li> <li>• auto-numbering</li> <li>• date validation</li> <li>• group notifications</li> </ul> |
| <b>I'm trying to</b>       | List their desired outcome, 'job-to-be-done', or workflow.                  | Student: Securely and quickly reserve books for academic research, both physical and digital. | Librarian: Fulfill multiple requests per day with 100% accuracy and minimal admin overhead.                 |                                                                                                                                                                                                                                                                                                                                      |
| <b>but</b>                 | Describe what specific problems or process barriers stand in the way.       | Current form allows past-date entry, causing 'phantom reservations' for students.             | Manual processes and paper-based tracking lead to delayed email alerts to librarians.                       |                                                                                                                                                                                                                                                                                                                                      |
| <b>because</b>             | Enter the technical 'root cause' that needs a solution.                     | Form input lacks server-side asynchronous validation for historical dates.                    | Backend processing is fragmented with no single platform engine to route notifications based on student ID. |                                                                                                                                                                                                                                                                                                                                      |
| <b>which makes me feel</b> | Describe the emotions and operational impact from the user's point of view. | Student: Frustrated by "successful" requests that turn out to be invalid.                     | Librarian: Stressed, overloaded, and prone to misplacing requests under high volume.                        |                                                                                                                                                                                                                                                                                                                                      |
