

Project Design Phase-II Data Flow Diagram & User Stories

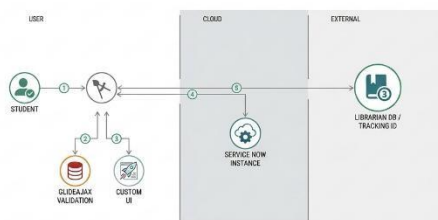

Date	30 June 2026
Roll Number	23A51A0535
Project Name	Library Book Request
Maximum Marks	4 Marks

Data Flow Diagram:

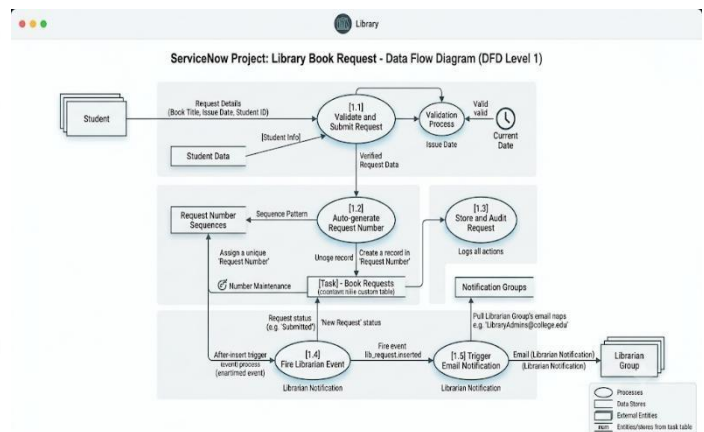

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within the system. This DFD graphically depicts the exact requirements of the **Library Book Request** system, showing how data enters and leaves the application, what processes modify the information, and where the data is stored within ServiceNow.

Example:

System Flow

1. Student configures GlideAjax credentials and custom tracking preferences.
2. GlideAjax validation service is called via the student-facing Custom UI.
3. Service Now processes request data and generates an Automated Tracking ID.
4. Validated and enriched data (including IDs) is written to the Central Library DB.
5. Real-time request and tracking status is visualized to all campus roles via Custom UI request and tracking status is visualized to all campus roles via Custom UI.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Student (Mobile User)	Registration	USN-6	As a student, I can search for a book by title or author to find it quickly.	I can access my account results	High	Sprint-1
	Book Search	USN-6	As a student, I can search for a book by title or author to find it quickly.	Search returns relevant results	High	Sprint-2
Student (Web User)	Book Request	USN-7	As a student, I can submit a request for a book that is currently available.	Request confirmation page displayed	High	Sprint-1
	Account History, Sprint-3)	USN-8	As a student, I can view my history of previous book requests.	List of all past requests visible	Low	Sprint-3
Librarian	Request Management, Sprint-2)	USN-9	As a librarian, I can view all pending book requests for my assigned library.	List of new requests with key details visible	Medium	Sprint-2
	Request Fulfillment, Sprint-2)	USN-10	As a librarian, I can update the status of a request from 'Requested' to 'Fulfilled' or 'Unavailable'.	Status change updates other user profiles	Medium	Sprint-2
	Catalog Management, Sprint-3)	USN-11	As a librarian, I can add a new book to the library catalog with title, author, and available copies.	Book appears in searches	Medium	Sprint-3
	Librarian, Notifications, Sprint-2)	USN-12	As a librarian, I can send a specific notification to a student about their request status (e.g., ready for pickup).	Student receives notification pickup.	Medium	Sprint-2
Administrator	Reporting	USN-13	As a librarian, I can view all search notification to a librarians for their request status (e.g., rope ready for administrator).	Student receives by dashboards, searched, etc.)	Medium	Sprint-1
Administrator	System Config	USN-14	As a studenn, I can add a new newbent for catalog catalogns with title, author, and available copies.	Inventory management and user tracking.	High	Sprint-1
